Vintage Style Accessories

With all things vintage being more en vogue than ever, proportion>london introduce Vintage Style Accessories - a perfect replication of early department store display stands. Emulating an age of refined elegance, this retro styled collection is manufactured in cast metal and turned wood with elements of upholstered papier mache and brass detailing.

For those who admire an old style - but prefer a modern interpretation, this collection is ideal. Perfectly thought through: there is a function for almost every element of accessory presentation. Each piece has been attentively designed and trialled to work well alone, or in clusters to show bigger accessory collections.

Choose from raw metal or plated brass finish stands with a number of base design options – add a multitude of interchangeable tops - then style with wood stains and innovative upholstery fabrics to create an individually tailored collection of VM equipment, for each particular brand. There are enough permutations to ensure that every store identity looks different.

In addition – we have a Vintage Style body collection to complement these accessory forms, allowing your whole store to take on a vintage vibe.
